Subject: FW: R3 & R5 fluorochemical plant in Parkersburg, WV

Hi Team – R5 received the below email chain regarding potential collaboration with ORD for the Washington Works facility. The email describes important potential work, and we are requesting that R5 be involved in these types of conversations. Please include Jenny Wilson in communications R3 has with DuPont, Chemours, ORD, or any other EPA office related to the Washington Works facility so that R5 is able to provide input on actions that may affect Ohio and adequately report out to upper management in R5. If legal discussions take place, I also need to be included in those communications. We will likewise make sure to include our R3 team members in similar communications. To help facilitate keeping each other included, does it make sense to set up regular team check-in meetings, or does everyone favor the more informal approach we've been taking as a team? Thanks-Jacquie

Sincerely,

Jacqueline Clark

Thought you should see this...
R3 requested sampling assistance from ORD-NERL near the Chemours facility.
Also, please note the conversation regarding Chemours stack sampling and a call next week.

Colleagues – for awareness – sounds like this is all in house, but there are lots of players in the PFAS world so just want to make sure you are aware.

Regards,. Andy

FYI, it looks like there is interest in what is going on in Parkersburg, WV from both a water and air perspective.

Tim,

I think this is different. In my conversation with Rick this morning

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

Andy,

Is this different from Poeske's interest?

Rick,

It was good to speak with you about the ongoing efforts to understand the impacts of PFAS contamination in the Parkersburg, WV area.

Regarding your interest in requesting NERL assistance with the measurement of PFAS in samples from the vicinity of the plant, I've attached letters of request from the State of New Hampshire and North Carolina that you can use as a guide. These requests should be addressed to Timothy Watkins, the NERL Laboratory Director.

I've also attached a document from October 2009 from DuPont which specifies where they shipped PFAS wastes for disposal in landfills.

Please let us know how we can help.

Thank you,

Andy
